What is important to know: the 4th and 5th year's subjects are taught in block system. In this case we have an absolute block-system. This means that the students will have one/two/three/four/five weeks one of the subjects (lecture and practice together). After this weeks they will have the exam. After the exam they do not need to deal with that subjects. For example Dermatology is a 3 weeks subject. During this 3 weeks they will have at the same time lecture and practice. It is Monday, Tuesday, Wednesday, Friday 8am till 4pm. Thursday is free. This schedule is the same of every subjects from these year's subjects, the difference is the duration of the weeks.				
This is valid for the Surgery I-II, Traumatology, Internal medicine I and II, Dermatology, Orthopaedics, Medical imaging, Ophthalmology, Urology, Pulmonology – Thoracic Surgery, Cardiology, Cardiac Surgery, Angiology, Vascular Surgery. Except from that is the Pharmacology, which last year was taught on Thursday every week at the same time during the whole year.				
What can be a problem if the student choose from 4th and 5th year: the 4th and 5th year's subjects' block are at the same time, because in this case they need to choose which one is more important. They can not be in same place at the same time.
